

MOTB-002

Indoor Termination Box

Description:

Termination box **MOTB-002** suits for jointing fibers with fiber pigtail and it protects fiber optic splices and helps to distribute. The termination box is either a wall-mounting type or desktop type, which is mainly used in telecommunication equipment room and network equipment room.

Termination box **MOTB-002** is suitable to connect the drop cables to the raiser fibers splices. It is also suitable to connect cable and pigtails. The termination box is for indoor wall mounting.

MOTB-002 is applicable for splicing 2 pieces of fiber cable with max. diameter Ø16mm.

Features:

- Light weight, small size, easy installation
- Provide splice connection protection of fiber cable and pigtail
- Made of engineering plastic material, which has mechanical strength, therefore it is reliable and long lasting
- Slide-N-Lock fiber optic splice tray with its opening angle above 90°C. Therefore it is easy for installation and maintenance

Specification:

<i>Model No</i>	MOTB-002
<i>Number of entry / exit ports</i>	2
<i>Number of splice tray</i>	12
<i>Max. fiber count</i>	24
<i>Max. number of pigtails</i>	12
<i>Dimensions (L x W x H)</i>	197 x 110 x 44 mm

Accessories:

Insulation tape, Heat shrinkable protective sleeve, Nylon tie, Labeling paper, Plastic shrinkable tube, Bolts, Manual
